Work Experience

Brooksource

Junior Front End Developer

05/2022-Present

- Contracted to work with Auto Owner's Insurance for 6 months to assist the development of one of the company's biggest technical initiatives.
- Collaborated with business analysts, and fellow software developers across the state through WebEx and discussed UI developments and standup meetings.
- Developed multiple UI features using React, Typescript, and BitBucket to refine the user experience of one of the biggest technological advances within the company.
- Managed tasks through Jira and Confluence to organize my daily workload and to gather information on the project specifications and how each tasks impacted the overall growth of the project.

Constellation Cat Café, [constellationcatcafe.com](https://www.constellationcatcafe.com)

Freelance Web Designer & Developer

07/2021-08/2021

- Outlined the new design of the website using Figma to showcase the flow and theme of the website, aligning with the message and personality of the company.
- Developed a playful user experience with smooth animations and dynamic content using HTML, CSS, JavaScript, and WordPress to coordinate their merchandise, events, and adoptable cats.
- Coordinated team meetings virtually to communicate and showcase the developments of the week and gain more information on how the brand wanted to be presented.

Personal Projects

L.A. Noire Speedrunning, [lanoirespeedrunning.com](https://www.lanoirespeedrunning.com)

08/2019-09/2019

- Produced a website using HTML and CSS that guides on the complexity of the concept of speedrunning and how to "speedrun" the game L.A. Noire.
- Modernized my website using the Responsive Grid System to create flexibility among users who want to use it on smartphones or tablets alike.
- Dedicated a whole summer to learning web development through online classes to build the website that I have today and to explore a different facet of programming.
